

HARD DRIVE DESTRUCTION MADE EASY. INTRODUCING THE ST-HDC HARD DRIVE CRUSHER.

Add the ST-HDC to any new Shred-Tech truck or retrofit an existing unit. The ST-HDC adds to your bottom line by providing an additional revenue stream for your business.

Hard Drive Destruction is one of the fastest growing segments in the Information Destruction Industry. The ST-HDC system destroys a hard drive in 6 seconds at your customer's site ensuring their piece of mind.

The ST-HDC is self contained and easy to operate, its engine off design makes it silent and fuel efficient. For safety, the ST-HDC was designed to be fully automated - featuring an auto-drop out feature which eliminates the need to handle the crushed hard drive. The electronic interlocks allow for completely safe operation.

Please contact your Shred-Tech Sales or Service Representative Today for information or to order your ST-HDC today.
